Addition

This text is being proposed to be added to the 2018 International Code for adoption by local municipalities.

Provide your new proposed code to be added to the existing code as cited above. *

Smoking. The lighting or exhaling of tobacco products, cannabis, or similar substances, and the emissions produced by electronic smoking or vaping devices.

Justification for Proposal

Provide reason to support your proposal based on the safety impact, enfforceability, cost effectiveness, or unique location conditions

Justification *

No existing definition of smoking. The 2016 version of ASHRAE 62.1 updated their definition of environmental tobacco smoke (ETS) to include electronic cigarettes. This addition impacts the requirements in Table 403.3.1.1 for ventilation rate requirements for smoking lounges. Currently there is no specific language defining vaping as smoking, and to require vape shops to provide mechanical ventilation.
