2411.4 CSST - Bonding Required

Where alterations, repairs or additions requiring a permit to occur, CSST shall be bonded in accordance with 310.2.1 through 310.2.5, unless deemed technically infeasible by the code official. Technically infeasible shall include, but not limited to, crossing a property line.

Justification for Proposal

Provide reason to support your proposal based on the safety impact, enfforceability, cost effectiveness, or unique location conditions

Justification *

An amendment to add section 2411.4 was brought forth by a different proponent. The reason statement made under that proposal applies. This proposal simply adds a sentence to the end of that indicating crossing a property line would make an installation technically infeasible. Bonding gas services in a townhome has been very difficult and at times impossible. Requiring a person to trespass in order to achieve a code provision should never be expected. This just clarifies that. Adding clarity ensures all jurisdictions interpret the code the same way which is the intent of the CICC.
